

Single Face HDPE

Expect superior performance from our plastic corrugated rolls.

Liberty Plastics rolls are made from our high-density polyethylene (HDPE) laminate board, which is lightweight, strong, versatile, reusable, and weather and chemical resistant. Our HDPE substrate is fabricated using a co-extrusion process that allows three distinct layers of material to come together and form a substrate that is unmatched. Liberty Plastics corrugated plastic is made in the USA with postindustrial recycled material content.

Our numerous product features drive your competitive advantage. So start experiencing the many benefits of HDPE.

Largest Variety of Rolled Plastic Corrugated

Meets diverse protection requirements; weights range from light to heavy

Unique Single Face Solution

Allows quick, easy and effective wrapping of valuable product & challenging shapes

Double Wall Solution

Cushions products from impact damage; keeps products safe during transit and storage

Laminate Design

Rolls easily & quickly; provides finished appearance; reduces waste and labor costs

Inventory Management

Offers inventory management services to support JIT inventory needs

Multiple Roll Size Options

Includes rolls up to 96" wide and roll lengths up to 900'

Multiple Color Options

Customizes rolls for identification purposes

Our high-performance HDPE rolls are a testament to the quality and durability of our recyclable stock solutions. And our service team relentlessly pursues just the right plastic corrugate solution for your unique needs.

Learn the Value of Laminate

Liberty Plastics uses high density polyethylene (HDPE) laminate board.

Our proprietary laminated corrugated substrate maintains service life of over 50 cycles even in the most rigorous applications. A strong performer in any environment, our plastic corrugate survives extreme heat and cold while resisting cracking.

The triple wall laminate design of our substrate resists punctures and surface abrasions and holds superior surface crush properties over polypropylene, yet is still lightweight.

Liberty Plastics Single Face HDPE Specifications

Part #	Width of Roll With Corrugation	Length of Roll Across Corrugation	Material Type	Color	Material Weight
4465D	48 inches	250 feet	HDPE Single Face	Black/White	110 # MSF
4465A10	96 inches	250 feet	HDPE Single Face	Black/White	110 # MSF

\$100.00 repacking fee will be charged to orders not containing 4 (4465D) or 4 (4465A10) rolls per skid
