

# Recycling Containers

## Rely on our plastic corrugated containers for high performance.

Liberty Plastics recycling containers are made from our high-density polyethylene (HDPE) laminate board, which is lightweight, strong, versatile, reusable, and weather and chemical resistant. Our HDPE board is fabricated using a co-extrusion process that allows three distinct layers of material to come together and form a substrate that is unmatched. Liberty Plastics corrugated plastic is made in the USA with postindustrial recycled material content.

Our numerous product features drive your competitive advantage. So start experiencing the many benefits of HDPE.

### Standard Size

44 Gallon, 20" x 16" x 38" standard container

### 4 Standard Options

Available styles include: Bottles & Cans, Plastic Bags, Recyclables Only & Unprinted

### Easy Setup

Requires minimal labor - no tools necessary

### Custom Color & Print

Custom substrate colors available; Identify brands or companies with customize printing of logos, colors and brand messages

## Learn the Value of Laminate

Liberty Plastics uses high density polyethylene (HDPE) laminate board.

Our proprietary laminated corrugated substrate maintains service life of over 50 cycles even in the most rigorous applications. A strong performer in any environment, our plastic corrugate survives extreme heat and cold while resisting cracking.

The triple wall laminate design of our substrate resists punctures and surface abrasions and holds superior surface crush properties over polypropylene, yet is still lightweight.

Our lightweight recycling containers are a testament to the quality and durability of our recyclable stock products. And our service team relentlessly pursues just the right plastic corrugate solution for your unique needs.
